When you use a DropStop® you will never spill a drop again. Simply roll up the disc, insert it into the bottleneck and pour without spilling a drop. Due to its flexible material DropStop® fits in every bottle.

A **printed** "promotional" DropStop® is an innovative, fun, and distinctive way to advertise and promote your brand, business or event. All you need to do is add your logo, special message or create your own unique design and you will have a low cost branding tool that can be reused over and over again by the recipient; meaning that your message will never be lost.

**"Personalise"** each printed DropStop® with a name, number or special code or key. So now each printed DropStop® can be differentiated. Ideal for national competitions, door prizes, lotteries, invitations or name cards. The applications are endless.

DropStop® uses the latest digital printing technology and can imprint in high-resolution full colour. The production process ensures that the ink will not come in contact with the wine, even after multiple uses.

### DropStop® is ideally used for:

- **Wineries** - A perfect cellar door accessory, wine club offer or retail GWP idea. A simple, executable and effective promotional tool.
- **Restaurants** - No better way to remind your customers of their experience. Use a DropStop® with every bottle of wine and hand it over as a reusable "business card" to all your VIP customers.
- **Corporate Branding** - Your clients will always remember that business seminar, trade show or corporate event. Why not use a printed DropStop® as a customer gift or even use it as your business card!
- **Events, Festivals, Tournaments or that "Special Occasion"** - If you are holding an annual event, need a unique invitation for a commemorative festival or simply want to give out a gift as a reminder of a special occasion like a wedding, anniversary and birthdays then a printed DropStop® would be ideal.
