

profit from the smart cellar system...

 **cellartags**TM
the smart cellar system

What are cellartags®?

cellartags® are a very clever Australian made wine tag that allow lovers of wine to record as much or as little information about their wine including label details, vintage, varietal, cost and approximate cellar time. cellartags® have been designed to compliment all kinds of cellars and make finding wine a breeze.

What makes cellartags® better than a wine tag?

The additional benefit to the clever cellartags™ design is the perforated hanger. After the bottle of wine has been consumed, rate it, then simply tear off the cellartags base and insert it into any standard business card holder for future reference - now that's clever.

Who uses cellartags®

"Cellar tags are a useful means of keeping physical track of bottles stored in open-rack storage, and which can operate alongside electronic storage details. They are well-designed and functional"

James Halliday

For more information or to purchase cellartags® or cellartags® hangers please contact Cellarbrate.

Tag it, find it, enjoy it! - cellartags are simply the smartest cellar solution
